# NEW! NAPTA *Process Systems*

ISBN: 9780136929048

This new First Edition of Process Systems provides comprehensive coverage that aligns with the NAPTA core course objectives and the Process Technology Examination—Chemical & Refining (PTEX-CR).

Features in *Process Systems* include:

• **Systems descriptions,** including simple and complex, covering a wide range of major industrial systems.

• **NEW FEATURE –** Safety Case Studies showing actual safety incidents related to each system.

• **Control diagrams** providing images from several simulation companies.

• **Learning Outcome** alignment with NAPTA core objectives, with links from chapter objective to text page.

• **Full Color Art Program** with more than 380 drawings and photos.

• **Key Terms** definitions at the beginning of each chapter and on text pages where content appears.

• **Chapter Review Questions and Appendix!** Checking Your Knowledge questions have been written to support chapter objectives. Answers are included in Appendix I.

• **Instructor Resource Package** including lesson plans, test banks, review questions, PowerPoints, and a correlation guide to NAPTA curriculum.

• **Pearson eText** available to facilitate digital learning!
